35. The AUTEC Technical Library is located at <http://www.npt.nuwc.navy.mil/contract>
36. The following is a partial list of questions and answers received. An additional set of questions and answers will be released with the next amendment.

1 - Is commercial air carrier certification required for the aviation operations contractor (fixed wing and rotary)?  
Yes

2 - When the fixed and rotary wing assets were placed in service where they new or used at that time.  
They were in used condition.

3 - Does the Navy intend to treat the inability to sustain contract performance arising from the non-availability of funds for a follow-on fiscal year, as a termination for convenience (FAR 52.249-6)?

In the highly unlikely possibility that there were no funds available for continued performance a change order would be negotiated with the contractor to downscope the work required.

4 - Defense Security Services has an office in your WPB facilities; what is their function as it relates to AUTEC and if Security reports are generated, whom are they addressed to?

The DSS local office services all of the Government contractors in the greater WPB area. The DSS office primarily interfaces with their assigned contractors.

5 - When do you expect the 3rd RTDS room, now under construction, to become operational, and will it be part of the M&O contract, to include the Berry Islands SATCOM?

We expect the third RTDS room to be completed by June, 2004 and it will include the Berry Islands.

6 - What are the requirements for personally owned vehicles brought to Andros

Island by employees in the areas of Vehicle registration and fees, Bahamian annual taxes, Import duties if any.

Please refer to AUTECH Policy and Procedure (APP) document 7-10G as well as the U.S. – Bahamian Agreement (Attachment 9 to the solicitation).

7 - Request that the Government provide a facility floor plan of 801 Clematis to include room numbers and telephone drops.

This information is not applicable to the solicitation as the WPB facility will be relocated prior to the start of the new contract.

8 - The FASCO building had 55 gal drum barrels lined up along the fence. Has a determination been made about HazWaste controls on each barrel?

Yes

9 - Several buildings (near Supply) have dangerous pieces of rusty door hangers falling down from the roof. Is there a plan to refurbish/upgrade prior to contract transition?

No

10 - Hurricane APP concerns. When is the last time all plywood has actually been installed on buildings? Are plywood and fasteners verified operational and not rotted?

As required

11 - During the site we were not able to examine the inside of the weapons bunkers. Will the government be providing information and documentation about the condition of the bunkers, alarm systems, and lighting? Will the copies of recent safety inspections, security inspections and ordnance inspections be provided?

No.

12 - Will copies of recent Safety and Food Sanitation Inspections be provided?

No.

13 - Vessel operators are required to be Coast Guard certified; a) are the current operators STCW certified; and b) is STCW certification a requirement under the new contract?

Yes as described in the PWS

14 - To promote the level playing field that we know you are interested in creating, request that NUWC provide current contractor staffing for AUTECH. This is something that AEDC provided to all bidders and helped ensure they had their bidders focused on the most important aspects of the competition--process and organizational improvements, etc.--and not on guessing at the "as is" state which most bidders consider the starting point from which to baseline their proposal approach. Note that this also affords the NUWC evaluators a common baseline from which to conduct a more efficient evaluation.

The precise level of staffing utilized in this performance based contract is proprietary to the incumbent contractor. The following information is provided to assist offerors in this area.

#### **GOVERNMENT ESTIMATED LEVELS OF EFFORT (LOE)**

LOE estimates are provided as Full Time Equivalent (FTE) positions based on 1,880 productive work hours per year per FTE. Figures reflect the Government's independent assessment of the level of effort per SOW chapter. The FTE count does not take into consideration the use of overtime, cross utilization of personnel or different approaches a company may take (including subcontracting) in accomplishing the work required. FTE's shown are not intended to be used as a minimum or maximum staffing level. The FTE's are provided to assist offerors in understanding the Government's perception of the general amount of work required to be performed and should not be used as a surrogate for the offeror's own LOE assessment. Most non-indigenous positions require a Government security clearance at the secret level.

SOW Chapter	Estimated FTE	Comments
1.1	N/A	Ch. 1.1 staffing is organization-dependent
1.2	18	No indigenous personnel are employed in this area.
1.3	33	Estimate is based on a labor force of 18 in WPB and 15 on Andros.
2.1	31	No indigenous personnel are employed in this area.
2.2	23	No indigenous personnel are employed in this area.
2.3	50	No indigenous personnel are employed in this area.
2.3A	7	Estimate is based on 1-HITS Engineer; 1- Radar Lead; 5- Radar Technicians. No indigenous personnel are employed in this area.
2.4	20	No indigenous personnel are employed in this area.
2.5	15	No indigenous personnel are employed in this area.
2.6	4	No indigenous personnel are employed in this area.
2.7	11	No indigenous personnel are employed in this area.
2.8	5	No indigenous personnel are employed in this area.
2.9	5	No indigenous personnel are employed in this area.
2.10	10	No indigenous personnel are employed in this area.
3.1	130	A significant portion of the effort in this area is performed by indigenous personnel.
3.2	50	A minor portion of the effort in this area is performed by indigenous personnel.
3.3	61	A minor portion of the effort in this area is performed by indigenous personnel.
3.4	49	A significant portion of the effort in this area is performed by indigenous personnel.
3.5	4	A minor portion of the effort in this area is performed by indigenous personnel.
3.6	161	Estimate includes 25 FTE, Fire Department; 40 FTE, Security. A significant portion of the effort in this area is performed by indigenous personnel.

15 - Section L-16 General Information states all offerors, other than the incumbent, will submit a proposal for a transition period not to exceed ninety (90) calendar days. Will this proposal be separate from the main proposal or part of the main proposal? If not separate, and given that the incumbent does not need to submit a proposal for transition, will the transition sections of the proposal be exempt from the page count limits?

That section of offeror's proposal dealing with their transition-in plan is exempt for the 100 page, technical proposal page count, cited in Clause L30.

16 - Do both government and contractor data reside in PeopleSoft? Are there any feeds to other systems and if so to what systems?

There is Contractor data only, at this time. However, there are plans to include several government systems such as Range Customer Billing. PeopleSoft is directly connected to the Spirent Gold Supply software

37. Clause L34X Technical Proposal – Complex Item (AUG 2001) Section III (A) is revised to read

**III. Past Performance.** In a separate attachment, provide information relative to past performance.

(A) Provide a list of all (maximum of 15) service contracts and subcontracts with a value exceeding \$5,000,000 that are currently in process or have been completed during the past four years. If the maximum is exceeded, list the 15 most current actions. Contracts listed shall include those with Federal, state, or local governments, as well as with commercial customers. Offerors that are newly formed entities without prior contracts should list contracts and subcontracts as required above for all key personnel. Include the following information for each contract and subcontract:
